3D Image-guided Adaptive Brachytherapy for Gynecology

Clinical Workshop

Organized by the Department of Radiation Oncology, Gunma University, Gunma Prefecture, Japan, in association with the Vienna Brachytherapy Group and Nucletron, an Elekta company.

Date: February 20 & 21, 2014
Location: Gunma University
Maebashi City, Gunma Prefecture, Japan

Please join us for the 3D Image-guided Adaptive Brachytherapy for Gynecology workshop hosted by Gunma University, which has broad experience in this technique for cervical cancer. Expert professors Richard Pötter and Christian Kirisits from Vienna General Hospital will be present to provide their insights and experiences.

The workshop is aimed at radiation oncologists, clinical physicists and radiation technologists working in a multidisciplinary team, who plan to implement 3D image-guided brachytherapy for gynecology. The workshop will also be open to people outside Japan who are interested in this advanced, informative course.

Faculty

Richard Pötter, MD PhD – Professor and Chairman
Christian Kirisits PhD, Assoc. Prof, Head of Brachytherapy Physics
Prof Takashi Nakano, MD PhD - Professor and Chairman
Prof Tatsuya Ohno, MD PhD - Professor
Dr. Shinee Noda, MD PhD - Radiation Oncologist
Dr. Tomoaki Tamaki, MD PhD - Radiation Oncologist

Dr. Ken Ando, MD - Radiation Oncologist
Prof Shingo Kato, MD PhD - Professor
Prof Junko Hirato, MD PhD - Professor
Dr. Masaru Wakatsuki, MD PhD - Radiation Oncologist
Dr. Ayako Tamura, MD - Diagnostic Radiologist

1 Department of Radiotherapy, Medical University of Vienna, Vienna General Hospital (AKH), Austria
2 Department of Radiation Oncology, Gunma University, Gunma Prefecture, Japan
3 Department of Radiation Oncology, Saitama Medical University, Saitama Prefecture, Japan
4 Department of Pathology, Gunma University, Gunma Prefecture, Japan
5 National Institute of Radiological Sciences, Chiba Prefecture, Japan
6 Department of Diagnostic Radiology, Tokyo Kita Social Insurance Hospital, Japan
